Technical Skills

Main Technologies TypeScript, JavaScript, Node.js, Python, React, Vue.js
Have some experience Docker, Go, Swift, bash

Experience

Sep 2022 – Present **UI/UX Engineer**, [rakuten.com](#), Tokyo.

I design and implement user interfaces and experiences for the [GORA Golf](#) project.

- Develop and maintain the front-end codebase using Vue.js and Nuxt.js technologies.
- Optimizing team processes and facilitating communication between team members to ensure seamless collaboration and timely delivery of project milestones.

Apr 2020 – May 2022 **Teamlead**, [sberdevices.ru](#), Moscow.

Led a team of frontend developers in the design and implementation of an innovative user experience for partner hotels on [sberdevices.ru](#). Utilized React and the component library, and implemented the json-rpc protocol to streamline communication between backend and frontend.

- Managed team workflow and prioritized tasks to ensure timely delivery of the frontend component of the project.
- Spearheaded the internationalization of several projects on [sberdevices.ru](#), resulting in increased customer satisfaction and engagement.
- Designed and implemented the project architecture, resulting in a more intuitive user experience and increased user engagement.

Jul 2018 – Apr 2020 **Senior Frontend developer**, [SuperJob.ru](#), Moscow.

Developed and maintained the web and mobile applications for [SuperJob.ru](#). Designed and developed new tools, utilities, and libraries to improve the efficiency and scalability of the company's applications.

- Implemented support for FlowType types during the development of multiple packages used in the project, resulting in improved code quality and reduced error rates.
- Successfully implemented visual regression testing, resulting in improved code reliability and a more streamlined testing process.

Oct 2016 – Jul 2018 **Software Architect**, [VK \(former mail.ru\)](#), Moscow.

Designed and developed various tools, utilities, and libraries for Media Projects Mail.Ru, resulting in improved code quality and more efficient development processes.

- Designed and developed a client-side framework using TypeScript and successfully integrated it with the company's projects, resulting in a more streamlined and efficient development process.
- Developed a system for prototyping and debugging client-side projects on a local computer without connecting to a remote server, resulting in reduced development time and improved productivity.
- Developed a set of utilities for monitoring critical errors on the company's high-load projects, resulting in improved code reliability and faster issue resolution.

Dec 2014 – Oct 2016 **Frontend developer, VK (former mail.ru), Moscow.**

Worked on a large code base of all Media project sites Mail.Ru

- Contributed to the development of several high-traffic websites at VK, including news.mail.ru, realty.mail.ru, auto.mail.ru, hi-tech.mail.ru, lady.mail.ru, and kino.mail.ru.
- Designed and developed a set of utilities to manage push notifications for Chrome browser, resulting in improved user engagement and a more seamless user experience.
- Took an active part in the development of a design system for Media Projects Mail.Ru, which was used to develop a publishing system and improve the consistency and efficiency of the company's design processes.

Oct 2008 – Dec 2014 **Software Developer, Kitty Hug, Moscow.**

Designed and developed server-side and client-side components using Django web framework, Django-CMS, Tornado, MySQL, JQuery, and React.

- Developed an e-commerce app and websites for high-profile clients, resulting in increased revenue and engagement.
- Built an interactive platform for a thematic blog using Django, React, and CoffeeScript for improved user experience.
- Integrated payment and reservation systems for better user experience and increased revenue.

Education

Master's Degree

2002-2007 **Software of Computer Equipment and Automated Systems(230105), South-West State University (former "Kursk State Technical University"), Kursk.**

Language Skills

Russian	Native speaker
English	Professional working proficiency
Spanish	Limited working proficiency
Japanese	Elementary proficiency
