## Technical Skills

Main Technologies TypeScript, JavaScript, Python, React, Node.js, styled-components  
Have some experience Docker, Go, Swift, bash

## Experience

- Sep 2022 – Present **UI/UX Engineer**, [rakuten.com](https://rakuten.com), Tokyo.  
I develop interfaces for the [GORA Golf](#) project
- Apr 2020 – May 2022 **Teamlead**, [sberdevices.ru](https://sberdevices.ru), Moscow.  
Working on the project «[sberdevices.ru/hotels](https://sberdevices.ru/hotels)» with a small team of frontend developers to provide an unique experience to the clients of partner hotels  
— Designed the architecture of the project using React, the component library and json-rpc protocol  
— Participated in the internationalization of several projects of sberdevices.ru  
— I managed a small team of developers, planned the team's work time and the process of releasing the frontend part of the project
- Jul 2018 – Apr 2020 **Senior Frontend developer**, [SuperJob.ru](https://superjob.ru), Moscow.  
Development of the application and the website of the company. Development of new tools, utilities and libraries  
— During the development of the project, implemented support for FlowType types for some packages used in the project  
— Successfully integrated a testing system [github.com/gemini-testing/gemini](https://github.com/gemini-testing/gemini) using docker, which allowed testing without using a remote server
- Oct 2016 – Jul 2018 **Software Architect**, [VK \(former mail.ru\)](#), Moscow.  
Designed and developed various tools, utilities and libraries for Media Projects Mail.Ru  
— Developed a client-side framework using TypeScript and integrated it with the company's projects  
— Developed a system for prototyping and debugging client-side projects on a local computer without connecting to a remote server  
— Developed a set of utilities for monitoring critical errors on the company's high-load projects
- Dec 2014 – Oct 2016 **Frontend developer**, [VK \(former mail.ru\)](#), Moscow.  
Worked on a large code base of all Media project sites Mail.Ru

- Actively participated in development of such projects as [news.mail.ru](http://news.mail.ru), [realty.mail.ru](http://realty.mail.ru), [auto.mail.ru](http://auto.mail.ru), [hi-tech.mail.ru](http://hi-tech.mail.ru), [lady.mail.ru](http://lady.mail.ru), [kino.mail.ru](http://kino.mail.ru)
- Designed and developed a set of utilities to manage push-notifications for Chrome browser
- Took an active part in the development of a design system for Media Projects Mail.Ru, which was used to develop a publishing system

Oct 2008 – Dec 2014 **Software Developer**, *Kitty Hug*, Moscow.

Designed and developed both server and client parts of company's projects. Used such tools as Django web framework, Django-CMS, Tornado, MySQL, JQuery and React

- Successfully developed a minimalistic e-commerce application to create online stores
- Developed websites for "СТС", "ДТВ" and "Домашний" TV channels, online stores of "Евродом" and "Leica Camera", corporate websites of "Связной-клуб", network of clinics "Семейный Доктор", "Propaganda club" and many other customers
- Developed an interactive platform for the thematic blog "It's My Wine"([itsmywine.ru](http://itsmywine.ru)) using Django framework(Python), React and CoffeeScript language
- Participated in integration with "Assist" and "Payonline" payment systems, "Saber" and "Sirena" airline reservation systems, "Hotelbook" and "Academservice" hotel reservation systems

---

## Education

### Master's Degree

2002-2007 **Software of Computer Equipment and Automated Systems(230105)**, *South-West State University (former "Kursk State Technical University")*, Kursk.

---
