in *Eugene Cheltsov*

Technical Skills

Main Technologies	TypeScript, JavaScript, Python, React, Node.js, styled-components
Have some experience	Docker, Go, Swift, bash

Experience

Apr 2020 – Present **Teamlead**, *sberdevices.ru*, Moscow.
Working on the project «sberdevices.ru/hotels» with a small team of frontend developers to provide an unique experience to the clients of partner hotels
— Designed the architecture of the project using React, the component library and json-rpc protocol
— Participated in the internationalization of several projects of sberdevices.ru
— I lead a small team of developers, plan the team time and release process of the frontend part of the project

Jul 2018 – Apr 2020 **Senior Frontend developer**, *SuperJob.ru*, Moscow.
Development of the application and the website of the company. Development of new tools, utilities and libraries
— During the development of the project, implemented support for FlowType types for some packages used in the project
— Successfully integrated a testing system github.com/gemini-testing/gemini using docker, which allowed testing without using a remote server

Oct 2016 – Jul 2018 **Software Architect**, *VK (former mail.ru)*, Moscow.
Designed and developed various tools, utilities and libraries for Media Projects Mail.Ru
— Developed a client-side framework using TypeScript and integrated it with the company's projects
— Developed a system for prototyping and debugging client-side projects on a local computer without connecting to a remote server
— Developed a set of utilities for monitoring critical errors on the company's high-load projects

Dec 2014 – Oct 2016 **Frontend developer**, *VK (former mail.ru)*, Moscow.
Worked on a large code base of all Media project sites Mail.Ru
— Actively participated in development of such projects as news.mail.ru, realty.mail.ru, auto.mail.ru, hi-tech.mail.ru, lady.mail.ru, kino.mail.ru
— Designed and developed a set of utilities to manage push-notifications for Chrome browser

— Took an active part in the development of a design system for Media Projects Mail.Ru, which was used to develop a publishing system

Oct 2008 – Dec 2014 **Software Developer**, *Kitty Hug*, Moscow.
Designed and developed both server and client parts of company's projects. Used such tools as Django web framework, Django-CMS, Tornado, MySQL, JQuery and React
— Successfully developed a minimalistic e-commerce application to create online stores
— Developed websites for "СТС", "ДТВ" and "Домашний" TV channels, online stores of "Евродом" and "Leica Camera", corporate websites of "Связной-клуб", network of clinics "Семейный Доктор", "Propaganda club" and many other customers
— Developed an interactive platform for the thematic blog "It's My Wine"(itsmywine.ru) using Django framework(Python), React and CoffeeScript language
— Participated in integration with "Assist" and "Payonline" payment systems, "Saber" and "Sirena" airline reservation systems, "Hotelbook" and "Academservice" hotel reservation systems
