Experience

Jul 2018 – Present — Senior Front-end developer, SuperJob.ru, Moscow.

Development of the application and the website of the company. Development of new tools, utilities and libraries

— Successfully completed the task of integrating a testing system github.com/gemini-testing/gemini using docker, which allowed testing without using a remote server

Dec 2014 – Jul 2018 — Software Architect(mostly front-end), Mail.Ru Group, Moscow.

Designed and developed various tools, utilities and libraries for Media Projects Mail.Ru

— Actively participated in development of such projects as news.mail.ru, realty.mail.ru, auto.mail.ru, hi-tech.mail.ru, lady.mail.ru, kino.mail.ru

— Developed proprietary client-side framework using TypeScript and integrated it with projects of company

— Designed and developed a set of utilities to manage push-notifications for Chrome browser

— Took an active part in the development of a design system for Media Projects Mail.Ru, which was used to develop a proprietary publishing system

— Developed a system for prototyping and debugging client-side projects on a local computer without connecting to a remote server

— Developed a set of utilities for error monitoring on most critical projects of Media Projects Mail.Ru

Oct 2008 – Dec 2014 — Software Developer, Kitty Hug, Moscow.

Designed and developed both server and client parts of company's projects. Used such tools as Django web framework, Django-CMS, Tornado, MySQL, JQuery and React

— Developed an application for building online stores(github.com/ChillyBwoy/django-plugshop) and later used it in projects such as powerball.ru

— Developed websites for "СТС", "ДТВ" and "Домашний" TV channels, online stores of "Евродом" and "Leica Camera", corporate websites of "Связной-клуб", network of clinics "Семейный Доктор", "Propaganda club" and many other lesser-known customers

— Developed interactive platform for the thematic blog "It's My Wine"(itsmywine.ru) using Django framework(Python), React and CoffeeScript language

— Participated in integration with "Assist" and "Payonline" payment systems, "Saber" and "Sirena" airline reservation systems, "Hotelbook" and "Academservice" hotel reservation systems
