🐼 ChillyBwoy

Summary

Software Engineer with 15+ years of experience designing and building large-scale web platforms and developer tooling. Specializes in **TypeScript**, frontend architecture, and building maintainable high-performance systems. Experienced in developing shared platforms, improving engineering workflows across teams, and exploring **LLM**-based interfaces for natural-language interaction with complex systems.

Skills

Languages	TypeScript, JavaScript, Python, Elixir
Frontend	Vue.js, React, Nuxt.js
Backend	Node.js, Phoenix, FastAPI, Django
Infrastructure	PostgreSQL, Docker
Focus Areas	Frontend Architecture, Developer Tooling, Platform Development

Work Experience

Nov 2023 – Present **Senior Application Engineer, RESTAR Inc.**, Tokyo, Japan, Full-time

Developing and maintaining a critical B2B platform with a focus on scalability, performance, and long-term maintainability.

- Researching and prototyping integration of LLMs, RAG pipelines, and tool-calling capabilities to improve information retrieval and enable natural-language interaction with internal systems through an AI-powered chat interface.
- Led migration of the core multi-source search system to a new architecture, improving scalability and maintainability.
- Designed and implemented a shared **i18n platform** used across multiple services.
- Introduced a standardized localization workflow that simplified translation management and reduced integration overhead.

Sep 2022 – Nov 2023 **Frontend Engineer (UI/UX), Rakuten**, Tokyo, Japan, Full-time

Developed user interfaces for the **Rakuten GORA** platform.

- Maintained and improved a large-scale **Vue.js / Nuxt.js** frontend codebase supporting a high-traffic production platform.
- Improved internal engineering workflows and team collaboration processes.
- Developed internal tooling to analyze repository activity and provide insights into engineering productivity.

Apr 2020 – Jun 2022 **Head of B2B2C Frontend Engineering, SberDevices**, Moscow, Russia, Full-time

Led frontend engineering for smart device interfaces powered by the company's voice assistant platform (**SberBox, SberPortal**).

- Led frontend development for device interfaces built with **React**.
- Architected and implemented a shared **Open-RPC client library** used across multiple frontend services.
- Designed an internationalization framework adopted across several frontend projects.
- Initiated and led development of a reusable **component library** adopted by multiple product teams.

- Jul 2018 – Apr 2020 **Senior Frontend Developer**, *SuperJob*, Moscow, Russia, Full-time
 Developed and maintained web and mobile applications for the SuperJob platform.
- Built internal frontend tooling and shared libraries that improved development workflows and reduced code duplication.
 - Introduced **Flow** static type checking across multiple frontend packages, improving code reliability.
 - Implemented **visual regression testing**, significantly improving UI stability.
- Oct 2016 – Jul 2018 **Software Architect**, *VK (formerly Mail.ru)*, Moscow, Russia, Full-time
 Developed internal tools and frameworks for Mail.ru Media Projects.
- Designed and implemented a **TypeScript**-based frontend framework used across multiple internal projects.
 - Built a local development and debugging environment that significantly improved developer productivity.
 - Developed monitoring tools for detecting and analyzing critical errors in high-load systems.
- Dec 2014 – Oct 2016 **Frontend Developer**, *VK (formerly Mail.ru)*, Moscow, Russia
 Maintained and expanded frontend architecture for Mail.ru Media Projects.
- Worked on high-traffic products including **news.mail.ru**, **auto.mail.ru**, **hi-tech.mail.ru**, **realty.mail.ru**.
 - Developed Chrome push notification infrastructure to improve user engagement.
 - Contributed to a shared **design system** used across multiple media products.
- Oct 2008 – Dec 2014 **Software Developer**, *Kitty Hug*, Moscow, Russia, Full-time
 Developed full-stack web applications for commercial and media projects.
- Built full-stack applications using **Django**, **Tornado**, **React**, **MySQL**, and **jQuery**.
 - Delivered e-commerce platforms and content-driven websites for multiple clients.
 - Integrated payment and reservation systems supporting online transactions.

Education

- 2002 – 2007 **Engineering, Computer and Automated Systems Software (230105)**, *South-West State University (formerly Kursk State Technical University)*, Master's degree, Kursk, Russia
