🐼 ChillyBwoy

Summary

Software Engineer with 15+ years of experience building web platforms and developer tools. Focused on **TypeScript**, **Python**, software architecture, and maintainable systems.

Skills

Languages	TypeScript, Python, Elixir
Frontend	Vue.js, React, Nuxt.js, Next.js
Backend	FastAPI, Phoenix, Node.js
Infrastructure	PostgreSQL, Docker
APIs	REST, OpenAPI
AI	RAG, embeddings, tool-calling

Work Experience

Nov 2023 – Present **Senior Software Engineer**, *RESTAR Inc.*, Tokyo, Japan, Full-time
Developing and maintaining a B2B real estate platform.

- Researching and prototyping a **RAG**-based search system with a natural language interface that can integrate with the project's internal systems and tools.
- Migrated the core multi-source search system to a new architecture, improving scalability and maintainability.
- Designed and implemented an open-source **i18n** library that simplified frontend localization and maintenance.
- Standardized the localization process, making translations easier to manage and integrate.

Sep 2022 – Nov 2023 **Frontend Engineer (UI/UX)**, *Rakuten*, Tokyo, Japan, Full-time
Developed user interfaces for the **Rakuten GORA** platform.

- Worked on improving the team's Agile processes and development workflow.
- Developed and maintained frontend features for the Rakuten GORA platform.
- Built internal tools to analyze repository activity and engineering productivity.

Apr 2020 – Jun 2022 **Lead Frontend Engineer**, *SberDevices*, Moscow, Russia, Full-time
Led frontend development for the B2B2C platform on **SberBox** and **SberPortal**.

- Led the development of a shared frontend architecture used across multiple smart device products.
- Designed and implemented a shared **Open-RPC** client library used by multiple frontend services.
- Designed an **i18n** framework that was adopted by several frontend projects.
- Designed a telemetry library for product applications, improving error monitoring and performance tracking.
- Built a reusable component library adopted by multiple product teams.

- Jul 2018 – Apr 2020 **Senior Frontend Engineer**, *SuperJob*, Moscow, Russia, Full-time
Developed web and mobile applications for the SuperJob platform.
- Built internal frontend tools and shared libraries for the company's projects.
 - Improved type coverage across multiple frontend packages using **Flow**.
 - Worked on introducing **visual regression testing** for frontend applications.
- Oct 2016 – Jul 2018 **Software Architect**, *VK (formerly Mail.ru)*, Moscow, Russia, Full-time
Worked on developing and maintaining frontend architecture for Mail.ru Media projects.
- Developed a **TypeScript**-based frontend framework used across multiple internal projects.
 - Designed a local development and debugging environment for frontend applications.
 - Developed monitoring tools for detecting and analyzing production errors.
- Dec 2014 – Oct 2016 **Frontend Engineer**, *VK (formerly Mail.ru)*, Moscow, Russia
Developed internal tools and frameworks for Mail.ru Media projects.
- Worked on high-traffic products including **news.mail.ru**, **auto.mail.ru**, **hi-tech.mail.ru**, **realty.mail.ru**.
 - Developed a Chrome push notification system for Mail.ru Media projects.
 - Contributed to a shared **design system** used across multiple media products.
- Oct 2008 – Dec 2014 **Software Developer**, *Kitty Hug*, Moscow, Russia, Full-time
Developed full-stack web applications for commercial and media projects.
- Developed full-stack applications using **Django**, **Tornado**, **React**, **MySQL**, and **jQuery**.
 - Built e-commerce platforms and content-driven websites for multiple clients.
 - Integrated payment and reservation systems into web applications.

Education

- 2002 – 2007 **Engineering, Computer and Automated Systems Software (230105)**, *South-West State University (formerly Kursk State Technical University)*, Master's degree, Kursk, Russia
